

Dear colleagues!

I am contacting you once more to inform that time and room is now settled concerning the "common interest group" for microscopic colitis at the UEGW to introduce the PRO-MC collaboration – building a European MC register.

Meeting Title: PRO- MC collaboration - building a European registry for microscopic colitis

Affiliated Society: EMCG

Date: Sunday, October 16, 2016

Time: 16:00 – 18:00

Room: Room L7

Level: 01

Please spread the news and contact colleagues in your country who you believe would be willing to participate in this exciting project.

I would be delighted to see you at the meeting.

At the last forum meeting in Vienna I had the opportunity to talk to you about microscopic colitis (MC) and our ambition to create a European registry which was enabled by the UEG LINK award 2014. I can now happily announce that this registry (the PRO-MC collaboration) is up and running and the first patients have been included.

For more information you can even read the hyperlink of the UEG

journal: <http://ueg.sagepub.com/content/4/3/478?etoc>

or visit our homepage: www.emcg-ibd.eu to get all necessary documents to participate and inform yourself about the European registry PRO-MC.

Sincerely,

Andreas

Andreas Münch MD, PhD

Head of the European Microscopic Colitis Group

Dept. of Gastroenterology and Hepatology

University Hospital
